

INSECT CITIES by Amelia Hine

Imagine you're an insect!

Insects come in all different colours and shapes. What would you look like?

Can you draw and decorate this insect to match your imagination?

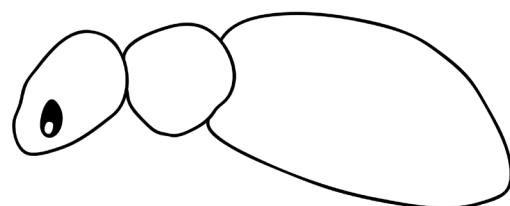

Antenna?

Pincers?

Butterfly wings?

Spots?

What colour would you be?

Would you like to have small wings?

A sharp stinger?

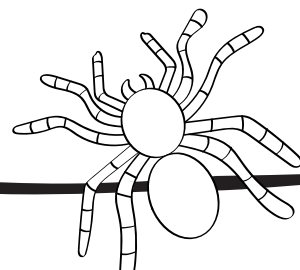

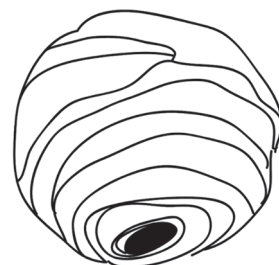

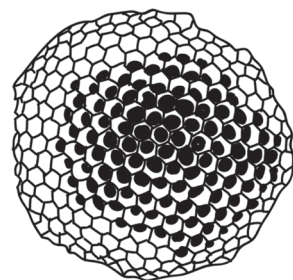

Butterfly wings?

Fast wings?

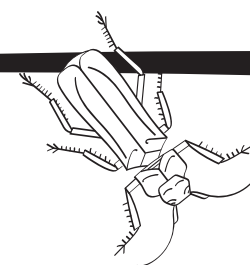

Insect buildings!

Insects build structures, homes or nests to live in, lay eggs or store food.

What would your insect building look like?

Imagine if insects built Brisbane.

How might the city look?
